

### Description

Module to select the winter or summer cycle on a heat-pump. It is usually used in systems with fan-coil units but it can be also used for water radiating floor systems when cooling and heating are desired.

The cycle is selected together with the Season selection on the APP.

The unit must be associated to each thermostat using the same heat-pump.

### Accessories

None.

### Electrical characteristics

Power supply:	230 V 50 Hz
Consumption:	0.5 W
Maximum current:	6 A total
Contact voltage:	3.3VDC to 230VAC

### Certifications

CE  
IEC 60669-2-1  
Low voltage directive 2014/35/EU  
EMC directive 2014/30/EU

### Dimensions

A = 35 mm (2 modules)
B = 90 mm
C = 62 mm
D = 46 mm
E = 58 mm
